

Project Manager

The opportunity:

At Hitachi Energy, we are advancing a sustainable energy future for all. As a Project Manager, you will play a key role in delivering innovative energy and infrastructure projects that support the global energy transition. Working with customers, engineering teams, suppliers, and business stakeholders, you will lead projects from initiation through completion, ensuring successful execution while creating value for our customers and communities.

This is an exciting opportunity to manage complex and impactful projects in a dynamic international environment. You will be empowered to drive performance, lead cross-functional teams, and help shape solutions that improve the reliability, efficiency, and sustainability of energy systems around the world.

If you thrive in a collaborative environment, enjoy solving challenges, and are passionate about making a meaningful impact, we would love to hear from you.

How You Will Make an Impact

- Lead the successful execution of projects from planning and contract handover through delivery, commissioning, and closure.
- Ensure projects are delivered safely, on time, within budget, and in accordance with quality and customer expectations.
- Coordinate multidisciplinary teams and foster effective collaboration across engineering, supply chain, manufacturing, site, and service functions.
- Manage project schedules, budgets, resources, risks, and opportunities while driving proactive decision-making.
- Build and maintain strong relationships with customers and key stakeholders, serving as the primary point of contact throughout the project lifecycle.
- Identify, assess, and mitigate project risks while managing changes, claims, and contractual obligations as required.
- Drive continuous improvement by applying lessons learned, sharing best practices, and promoting a culture of safety, integrity, and operational excellence.

Your Background

- Bachelor's or Master's degree in Engineering, Project Management, Business, or a related field.
- Proven experience managing large and complex projects within the energy, power, utilities, industrial, infrastructure, EPC, or related sectors.
- Demonstrated success in leading cross-functional teams and delivering projects with strong financial, contractual, and operational performance.
- Solid understanding of project management principles, including planning, scheduling, risk management, stakeholder management, and cost control.
- Strong communication, leadership, negotiation, and problem-solving skills, with the ability to collaborate effectively in international and multicultural environments.
- Fluency in English; additional languages are considered an advantage. PMP, IPMA, PRINCE2, or equivalent project management certification is a plus

More about us
